In the newly added claims, Applicants have claimed additional preferred embodiments.

Claims 54, 56, 59, 61, 63, and 65 state that the cGMP PDE-5 inhibitor(s) is sildenafil or a pharmaceutically acceptable salt thereof. Support is in the specification at page 6, lines 13-14.

Claims 55, 57, 60, 62, 64, and 66 specify that the cGMP PDE-5 inhibitor is sildenafil citrate, as supported at page 6, line 14.

4/97, M4, (6/7)

Claims 65 and 66 claim a dual release formulation as claim d in (allowed) claim 52. The claims additionally refer to the first portion of the dual release formulation as containing "a multiplicity of coated cores". Support is in the specification at page 8, lines 25-30.

It is respectfully submitted that new claims 54-66 are allowable for the reason that each depends from an already-allowed claim and each is supported by the specification. No further issues are seen, and a Notice of allowance is respectfully requested.
